I have been acquainted with the architectural practice of Ken Peterson Architects for over 20 years in my roles of State Manager for St Martins Properties and currently State Property Manager for the Coles Group in Western Australia.

Kens intimate and specialist knowledge of retail concept design has made him an obvious choice by major retail landlords and developers who are confident that their projects will achieve the desired success for their considerable financial investments.

The fact that his practice is commissioned by one of Australia's leading retail groups only emphasises the confidence that clients have in his conceptual design ability and comprehension of the retail industry.

I would recommend Ken and his practice to anyone seeking the skills of a very experienced architectural group for their projects.

Yours sincerely
